Way Forward

Regular awareness campaigns are recalling the participation of every citizen in maintaining a clean and safe environment. The concept of sensitisation on a regular basis is to place new thoughts for a more sustainable use of our beaches. Beach users are getting more conscious about the do's and don'ts and it is observed that we are having a positive response from the public in general.

In order to keep pace with the growing demands of the public, we are planning to create a restructuration plan as a way forward to give a better service delivery to the public. The Authority is also considering to boost its development into a multifaceted organisation with improved legal and institutional frameworks.

The Beach Authority will continue with its activities of clean up and embellishment on all proclaimed public beaches and the action plan for period **March 2017 to March 2018** is annexed.
